CB

Locate slots on bottom of side panel and wall fixing strip and push down onto corner bracket. Fix wall fixing strip to wall using appropriate anchors.
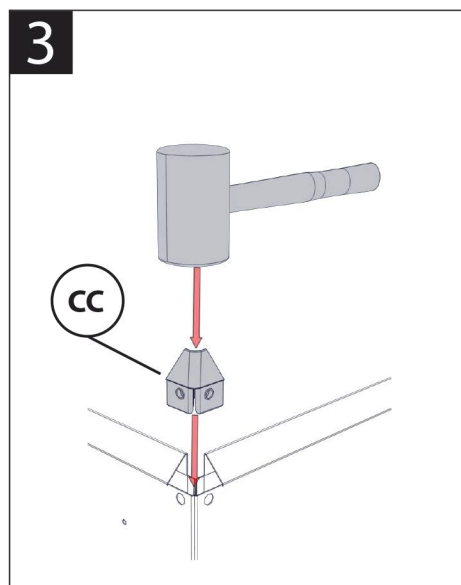

2

S
CB

TIMBER BASE OPTION

If no concrete slab / other flat surface is available, use timber base frame as shown.
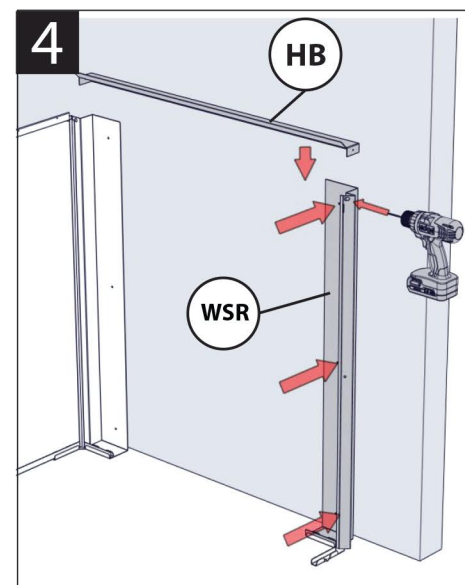

2a

CB

LEVELLING FEET OPTION

If installing on an uneven / unlevelled surface, please use the optional feet (through holes in bottom corners) to raise the box and adjust the nuts below / above the corner bracket to suit.

3

CC

Now insert a plastic cap into the holes in the top of the panel to join them. Tap into place with a mallet.

4

HB
WSR

Install the Horizontal Bridge Cover, installed on the outside of the wall fixings strips. Use 2 metal tek screws to attach the horizontal bridge cover to the wall fixings strips. Fix the wall fixing strips to the wall using appropriate wall fixing anchors through the pre drilled holes.
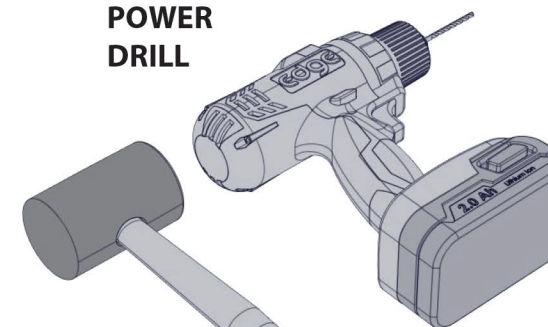

5

CC
S
F
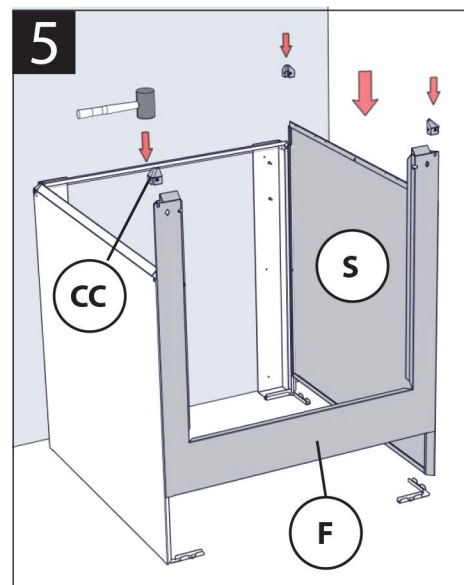

Insert other side panel and cap. Slide front panel onto corner brackets. Insert the last 2 caps. If you have modelS >1.6m wide, see step 6 before inserting caps.
